Aater Imran

AI Automation Engineer

Islamabad, Pakistan | aaterimran58@gmail.com | +92 310 9176998 | github.com/aaterimran58-del | linkedin.com/in/aater-imran-787131388

SUMMARY

AI Automation Engineer and final-year Software Engineering student building AI-powered automation systems — from computer vision security agents to n8n-driven business workflows. Focused on practical engineering with Python, FastAPI, AI/LLM integration, and automation pipelines that turn repetitive business processes into scalable, working systems.

EXPERIENCE

AI & ML Engineer — Intern

Zynvex Solution • 2 Months

Worked as an AI and ML Engineer intern, contributing to AI-powered systems and automation-focused engineering work.

Independent AI/ML Practitioner

Self-Driven Projects • 1+ Year

Built and shipped AI automation systems independently, including computer vision detection, n8n workflow automation, and LLM-integrated tools across 8+ projects.

EDUCATION

BS Software Engineering

CUST, Islamabad • 7th Semester • CGPA: 2.79

SKILLS

Programming	Python, JavaScript
AI / ML	AI/LLM Integration, YOLOv11, OpenCV, Computer Vision
Automation	n8n, Webhooks, Workflow Automation
Backend	FastAPI, Flask, SQLAlchemy
Databases	PostgreSQL
Other	REST APIs, WhatsApp API, Weather API Integrations

PROJECTS

ProcessIQ — AI Business Process Intelligence & Automation Copilot

AI-powered system that analyzes business processes to identify bottlenecks, risks, and automation opportunities, generating AI-driven recommendations with n8n-oriented workflow planning. *Python, FastAPI, React, Vite, SQLAlchemy, PostgreSQL, AI/LLM, n8n*

AI CCTV Security Agent

Real-time computer vision system detecting fights, weapons, fire, falls, strangers, and missing helmets from camera feeds, with automated incident alerts and workflow handoffs. *Python, YOLOv11, OpenCV, FastAPI, PostgreSQL, n8n*

AI / Tourism Website

Tourism-focused website promoting travel destinations with a responsive, user-friendly interface. *HTML5, CSS3, JavaScript*

Weather-Based Tourism Automation

n8n automation workflow that uses live weather data to generate weather-aware travel recommendations. *n8n, Weather API, API Integrations*

AI Email Analyzer / Automation

AI-powered workflow that classifies and analyzes incoming emails to trigger automated business actions. *n8n, AI/LLM, APIs, Webhooks, Python*

AI Bug Triage Automation

Automated workflow that processes incoming software issues using AI-assisted classification for triage. *n8n, AI/LLM, APIs, Automation Workflows*

WhatsApp AI Automation

Automation connecting WhatsApp with AI-powered workflows — message processing, AI responses, payment link generation, and follow-ups. *WhatsApp API, Webhooks, n8n, AI/LLM*

Advanced Book Management System

Full-stack book management system with standard cataloguing functionality backed by a database. *Python, Flask, Database*
